## DETAILED ACTION

### *Allowable Subject Matter*

Claims 1, 3-5 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claims 1, and 3-5, there is no prior art of record that teaches alone or in combination an LCD panel comprising: a LCD panel displaying an image; printed circuit board arranged along one side of the LCD panel; and a plurality of flexible circuit boards which connect the LCD panel to the printed circuit, board the plurality of flexible circuit boards having at least two driver ICs mounted thereon, each driver IC outputting a liquid crystal driving signal to drive the liquid crystal of the LCD panel; wherein: **the PCB includes a wiring system so arranged that a bundle of main wirings, which receive an input signal, have plural bundles of branch wirings, each bundle of branch wirings outputting the input signal to one of the driver ICs mounted on the flexible circuit board**, and the driver ICs in each flexible circuit board are cascaded to each other with the input signal by internal wirings in the flexible circuit board.

Uchiyama US Patent 5737272 teaches an LCD panel comprising: a LCD panel displaying an image; a plurality of flexible circuit boards (see fig. 83) which connect the to LCD, the plurality of flexible circuit boards having at least two driver ICs (fig. 3 1300, 1200, and 1100) mounted thereon, each driver IC outputting a liquid crystal driving signal to drive the liquid crystal of the LCD panel the driver ICs in each flexible circuit board are cascaded to each other with the input signal by internal wirings in the flexible circuit board. Uchiyama also teaches a bundle of main wirings which receive and input

signal however lacks the teaching of the main bundle having a plurality of branch wirings each bundle of branch wirings outputting the input signal to one of the driver ICs mounted on the flexible circuit board. Uchiyama teaches all of the driver IC's across multiple FPCB cascaded with respect to teach other therefore does not require main wiring with branch wirings extending to teach flexible PCB.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
